AGENTS AND TOOLS

Model Context Protocol (MCP)

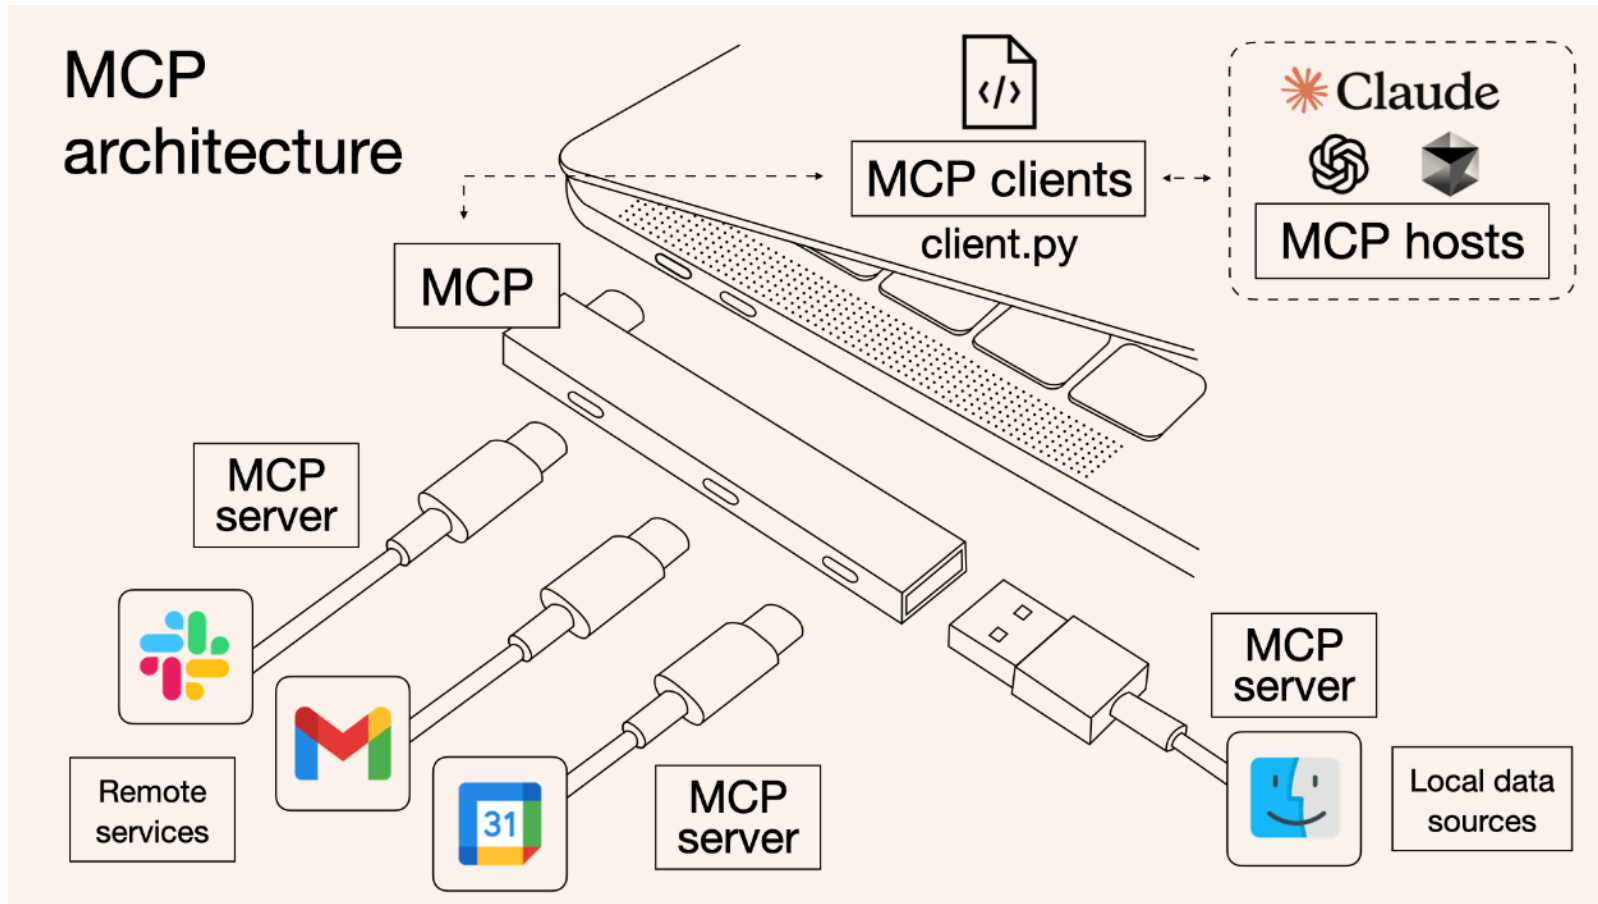

MCP is an open protocol that standardizes how applications provide context to LLMs. Think of MCP like a USB-C port for AI applications. Just as USB-C provides a standardized way to connect your devices to various peripherals and accessories, MCP provides a standardized way to connect AI models to different data sources and tools.

 **MCP Documentation**
Learn more about the protocol, how to build servers and clients, and discover those made by others.

 **MCP in Claude Desktop**
Learn how to set up MCP in Claude for Desktop, such as letting Claude read and write files to your computer's file system.
